

# CONTRASTS

## BARIUM PASTE 20ML

Barium Sulphate, radiopaque paste that provides excellent radiographic visualization of the true hoof wall. The tube contains 20mls of paste. The paste appears as an opaque (white line) on the image, when applied in a continuous bead from the coronary band to the ground surface. Due to the very thin depth of horn at the most proximal crown of the hoof wall the actual horn margin is rarely visible on even the softest penetrating views.

## PRIMOVIST (1 X 10ML) PRE-FILLED SYRINGE

### Primovist (1 x 10ml) Pre-filled syringe

Primovist is indicated for the detection of focal liver lesions and provides information on the character of lesions in T1-weighted magnetic resonance imaging (MRI). Primovist is a ready-to-use aqueous solution to be administered undiluted as an intravenous bolus injection.

**CTN = (1 x 10ml)**
